WORK EXPERIENCES

2018 - Present

Frog Design

Munich - DE / Remotely

Frog is a leading global design and strategy consultancy. As a Frontend Engineer my responsibilities include:

- Writing modern, performant maintainable code for a diverse array of clients.
- Working in, and sometimes leading, teams either small (3) or big (20+) using Agile practices.
- Enforcing best practices on both design and development and filling the communication gap between the two teams.
- Informing the design team of opportunities and limitations of the tech stack.
- Prototyping tools and web applications for internal use.

2015 - 2018

Arduino

Turin - IT / Malmo - SE

Arduino is an open-source electronics platform. As a design technologist my responsibilities included:

- Front-end development for the company website using PHP and Javascript.
- Writing libraries and tutorials used by thousands of users.
- Designing and prototyping smart home appliances using open source software and hardware.
- Beta testing new products and writing documentation.
- Leading workshops and teaching at universities as well as private companies.
